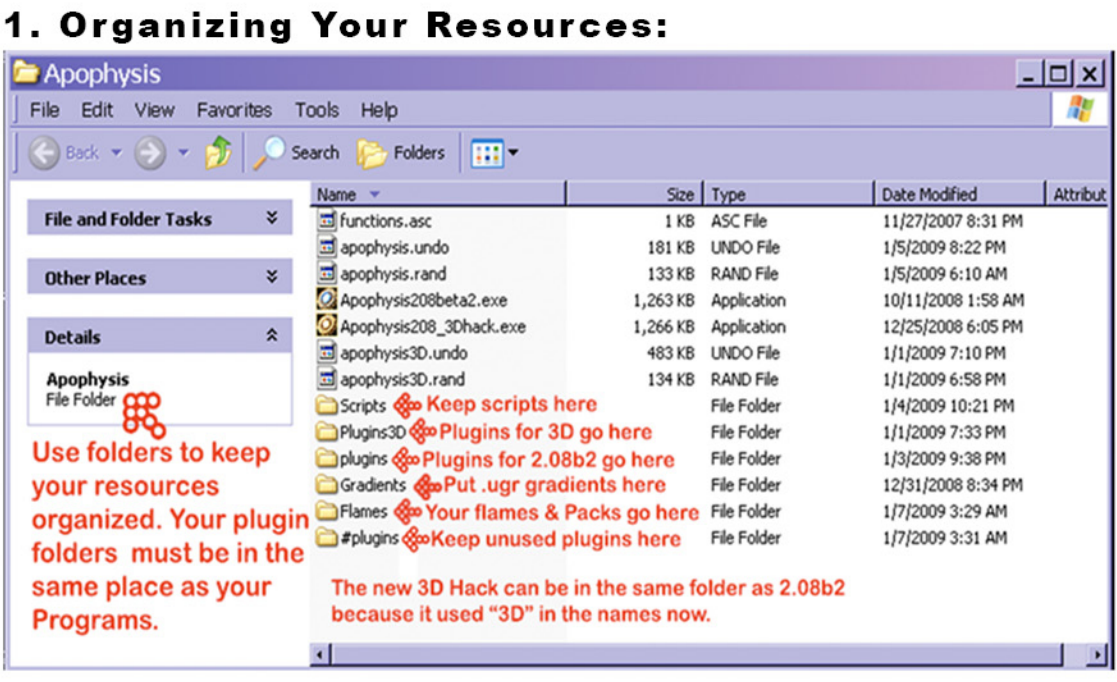
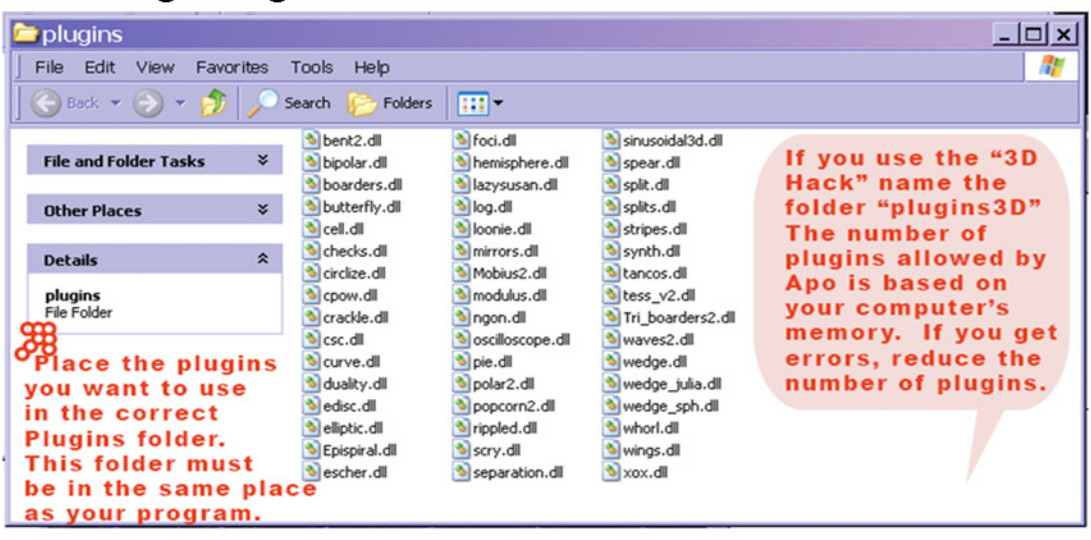
Using Resources In Apophysis
by Colliemom

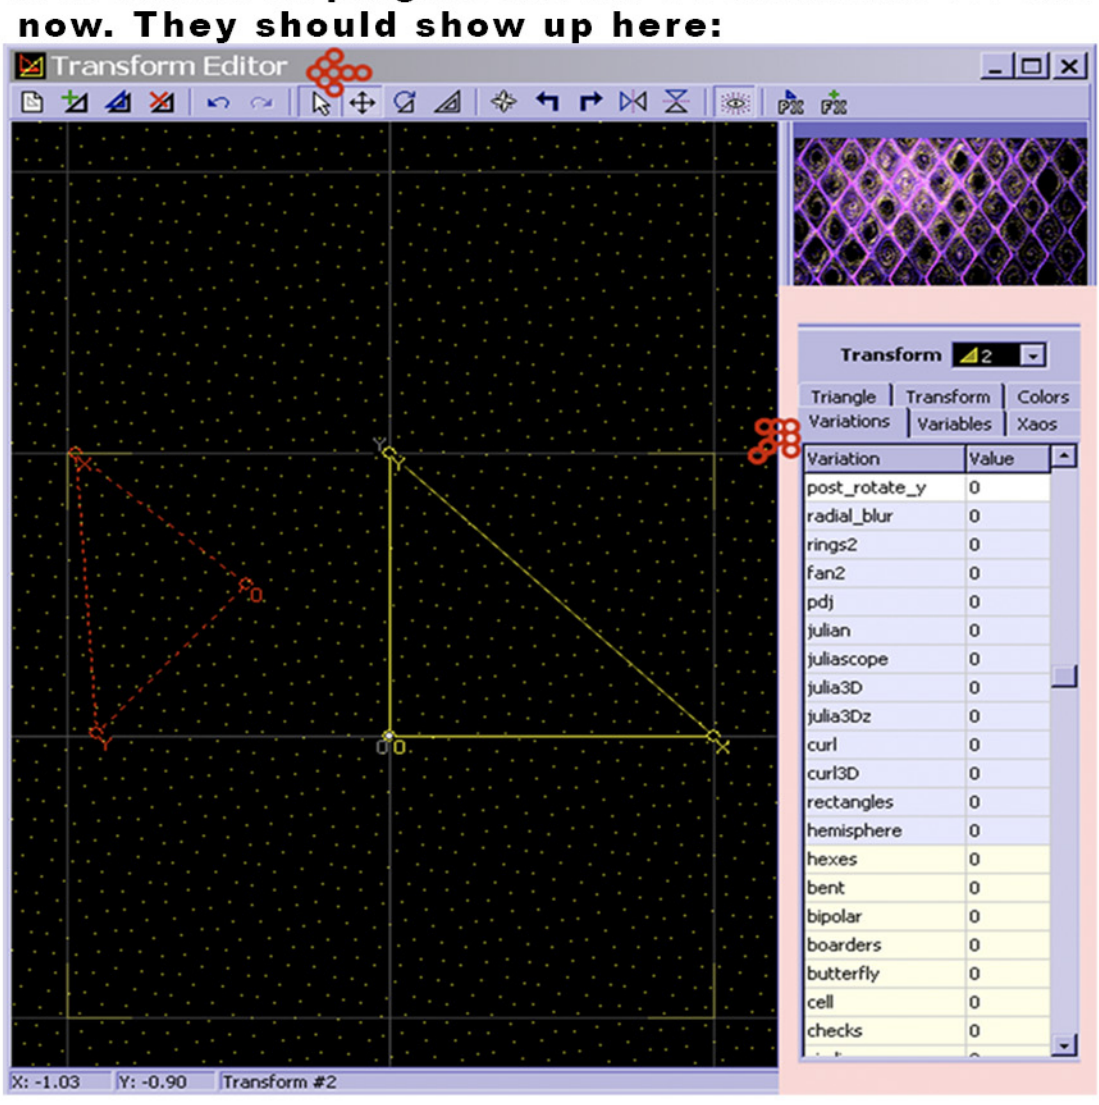
1. Organizing Your Resources:



2. Using Plugins:



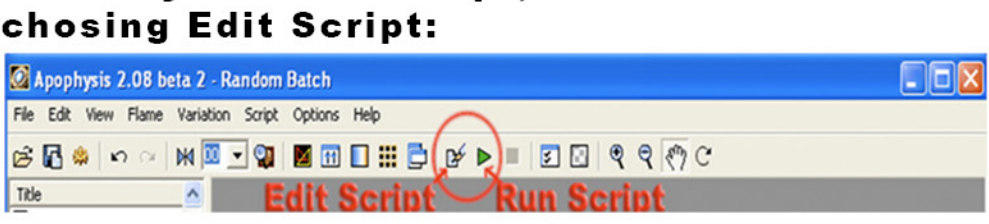
Your installed plugins should be available for use now. They should show up here:



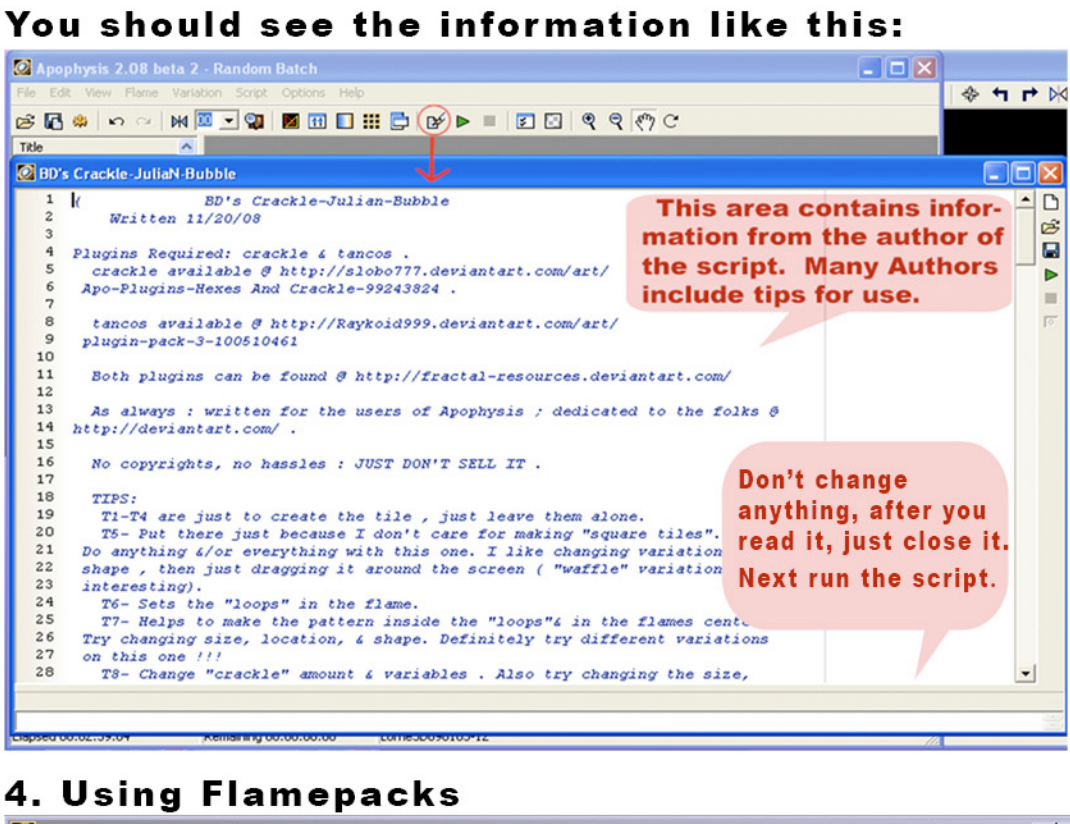
3. Using Apophysis Scripts:

Opening the script:

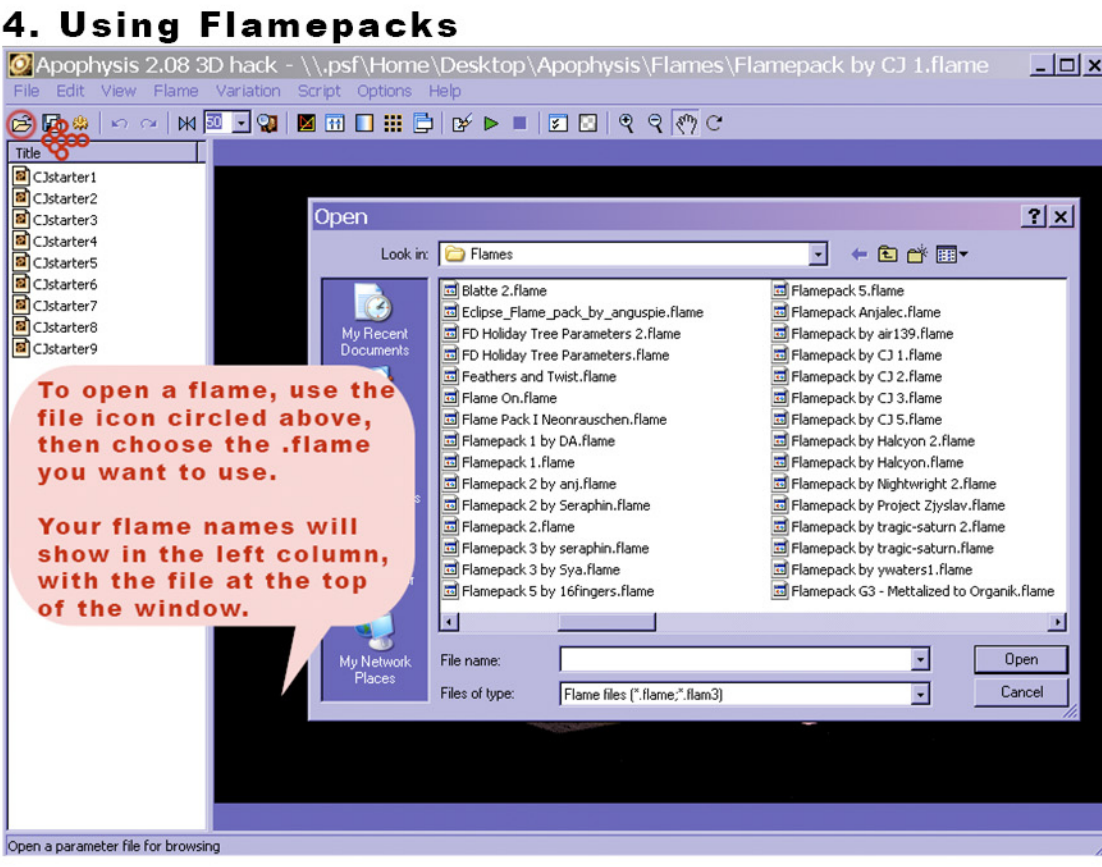
Before you use a script, read the comments by chosing Edit Script:



You should see the information like this:



4. Using Flamepacks



Note: It is important to remember that Scripts, Flames and Tutorials are meant to be a starting point. Use the resources in the spirit they were made, DO NOT simply recolor or make small changes to the work and claim it as your own.

5. Using Gradients

I don't need to reinvent the wheel here because there is a great tutorial on using gradients posted here>
